

Pierre Kahunda

Full-Stack Developer · Johannesburg, SA · Remote · Open to EU · keith4321ben@gmail.com · github.com/King-Keith1 · linkedin.com/in/pierre-kahunda

PROFESSIONAL SUMMARY

Full-stack developer with a strong foundation across multiple stacks — Spring Boot, Django, React/Node.js — and a track record of shipping complete, deployed applications. Comfortable picking up unfamiliar languages and frameworks quickly. Seeking a junior role where I can contribute meaningfully and keep growing within a collaborative engineering team.

EXPERIENCE

Software Developer Intern — *Compuways* · Feb 2025 – Mar 2026 · Johannesburg, SA

- Diagnosed and resolved bugs in existing source code across multiple languages and frameworks.
- Collaborated with cohort peers on team projects, contributing to design decisions and implementation.
- Built and presented individual end-of-module projects, explaining technical decisions and architecture to instructors.
- Created technical walkthroughs and video demonstrations of programming concepts for each module.
- Debugged and reviewed peers' code, developing an eye for common failure points early in the development lifecycle.

PROJECTS

HRMS — Human Resource Management System — *Personal Project* · 2025

- Secured REST API built on Spring Boot with JWT authentication and role-based access control across three roles: Admin, Manager, and Employee.
- Applied the Strategy Pattern for payroll calculation, keeping logic open for extension without modifying existing code.
- React frontend with role-specific dashboards; backend deployed on Render, frontend on Vercel.
- Stack: Spring Boot, Spring Security, JPA/Hibernate, PostgreSQL, React.
- Live: hrms-main-self.vercel.app · Source: github.com/King-Keith1/hrms-main

DiceX — Multiplier Dice Game — *Personal Project* · 2025

- Casino-style game built in Django where users register, receive a \$100 starting balance, and wager against multipliers from 2× to 10×.
- Covers user authentication, Django signals, form validation, database transactions, and a full admin interface.
- Last 10 game results logged and displayed per user. Custom dark casino-themed UI.
- Stack: Django, Python, PostgreSQL.
- Source: github.com/King-Keith1/gamble

Wayfarer — Travel Companion App — *Personal Project* · 2025

- Four-feature travel app: live dual-timezone clocks with saveable pairs, currency converter with live API and offline fallback, IANA timezone Zone Finder, and localStorage-persisted Favourites.
- No external UI library — fully custom CSS with warm sandy light theme and cold navy dark theme.
- Stack: React, Vite, Node.js, Express.
- Live: wayfarer-fawn.vercel.app · Source: github.com/King-Keith1/time-currency-app

EDUCATION

Code College — *Full-Stack Web Development Programme* · 2025

- 12-month programme covering frontend, backend, databases, and software fundamentals through hands-on projects.
- Completed focused modules in HTML/CSS, JavaScript, React, Node.js, Python, Java, Spring Framework, Django, SQL, and MongoDB.
- Built and presented capstone projects at the end of each module in a structured, deadline-driven environment.

SKILLS

Frontend: HTML, CSS, JavaScript, React, Vite, HTMX

Backend: Node.js, Express, Python, Django, Java, Spring Boot, Spring Framework

Databases: MongoDB, MySQL, PostgreSQL, SQL

Tools: Git, GitHub, VS Code

CERTIFICATIONS

- Web Developer Bootcamp
- Java Developer Bootcamp
- Spring Framework
- Java Advanced
- Java Beginner
- MERN Stack (Full Stack Web Development)
- React Frontend Development
- Backend Development with Node.js
- Relational Databases & SQL Fundamentals
- Python Programming
- HTMX
- Introduction to Programming
